SUMMARY

Full-stack Web Developer with hands-on experience building and maintaining web applications across multiple tech stacks. Currently working at Notch, contributing to client projects including UNICEF and internal system development. Experienced in maintaining legacy systems and developing modern applications using Next.js, NestJS, Prisma, and PostgreSQL. Involved in building an internal ERP system and redeveloping large-scale client platforms with a focus on performance, scalability, and maintainability. Strong problem-solving skills with a focus on delivering reliable and user-centered solutions.

WORK EXPERIENCE

Junior Web Developer, NOTCH

Full-stack Web Developer - Jakarta, Indonesia (Jan 2026 – Present)

- Maintained and enhanced client web applications, including UNICEF platforms, ensuring stability, performance, and security
- Worked with legacy systems to troubleshoot issues, implement fixes, and support ongoing business needs
- Contributed to the development of an internal ERP system using NestJS, Next.js, Prisma, and PostgreSQL
- Developed and integrated backend APIs and frontend features for ERP modules to support internal operations
- Participated in the redevelopment of UNICEF web platforms using modern stack (NestJS, Next.js), improving scalability and maintainability
- Collaborated with cross-functional teams to deliver features and resolve technical issues efficiently
- Assisted in deployment, testing, and monitoring of applications to ensure smooth production releases

PROJECT EXPERIENCE

Laundry Web Application

Final Project – Fullstack Web Development Bootcamp

[Link](#)

- Developed RESTful APIs using Express.js and PostgreSQL for order and transaction management
- Integrated Midtrans payment gateway to support secure and reliable online transactions
