SUMMARY

Fullstack developer working in TypeScript across NestJS, Next.js, React, and PostgreSQL. At Notch, I am one of three engineers who rebuilt UNICEF Indonesia's donation platform, launched in October 2026, where I built authentication, access control, payment integrations, and the donor portal. Best Student, Purwadhika Fullstack Web Development (Batch 33).

SKILLS

Languages: TypeScript, JavaScript
Frontend: React, Next.js, Vite, TanStack Query, Zustand, Tailwind CSS, shadcn/ui, Formik, Yup
Backend: Node.js, NestJS, Express.js, REST APIs, JWT, OAuth2, Passport
Data: PostgreSQL, MySQL, Prisma, Redis
Integrations: Midtrans, Xendit, DOKU, Google OAuth, Cloudflare R2, Cloudinary, Nodemailer, Gemini API
Tools: Git, GitHub, Docker, Vercel, Railway, Postman
Spoken: Indonesian (native), English (professional working), Arabic (basic)

EXPERIENCE

Junior Web Developer — Notch (Creative Digital Agency), Jakarta — Jan 2026 – Present

UNICEF Indonesia donation platform *— 3-engineer team, launched Oct 2026 · NestJS, Prisma, PostgreSQL, Redis, React, Next.js*

- Built authentication and access control for the admin CMS and donor portal: JWT with refresh-token rotation in Redis, Google OAuth, single-device sessions, login rate limiting, and a role-based permission matrix.
- Integrated one-off and recurring donations with Midtrans, Xendit, and DOKU, including payment webhooks, a scheduled reconciliation job for recurring payments, and admin bulk tools to update or stop subscriptions.
- Shipped the donor portal end to end across API, CMS, and website: donation history, recurring-donation management, a gamified achievement and leaderboard system, and shareable reward cards.
- Built a CMS-driven popup and survey engine with scheduling, priority rules, and response analytics, letting the content team run campaigns without a code release.
- Wrote migration scripts moving users, roles, and media from the legacy MySQL system to PostgreSQL and Cloudflare R2, and added audit logging with before/after diffs for admin and donor actions.

Internal ERP *· NestJS, Next.js, Prisma, PostgreSQL, TanStack Query*

- Built the timesheet module: real-time start/pause/resume tracking, manual entries per client project, and Excel export.
- Designed a three-level overtime approval flow (employee → division head → director) with role-based guards.

PROJECTS

Arunika — AI personal finance assistant on Telegram — 2026

Python, SQLite, Telegram Bot API, Google Sheets API, MCP, WebSocket, systemd, Ubuntu VPS

- Built a Telegram assistant, used daily since Oct 2026, that logs expenses and budgets from chat to Google Sheets.
- Split privileges across services: the AI agent can only draft, approvals are signed with Ed25519, and a sandboxed worker re-verifies signature, plan hash, and target workbook before writing, with a ledger blocking duplicates.
- Cut Sheets API calls per transaction from ~14 to ~5, handled HTTP 429 quota errors with backoff and reconciliation, and replaced polling with a signal-driven worker (~5 s to write).

CoffeBar — Coffee shop management system · GitHub — 2026

React, Vite, NestJS, Prisma, PostgreSQL, Gemini API

- Built a POS with FIFO inventory costing and stock reservation, so profit is calculated from actual ingredient batches.
- Added a Gemini-based business advisor and 30-day restock forecast, guarded against prompt injection and off-topic output.
- Built daily cash reconciliation and a portion estimator that calculates remaining servings from the scarcest ingredient.

Laundry Web Application — Bootcamp final project · Live — 2025

Next.js, Express.js, PostgreSQL, Prisma, Midtrans, Tailwind CSS

- Built pickup-and-delivery ordering with Midtrans payments and order tracking, plus its PostgreSQL schema and REST API.

Event Management Platform — Bootcamp mini project · App / API — 2025

Next.js, Express.js, PostgreSQL, Tailwind CSS

- Built event ticketing with organizer and participant roles, payments, Nodemailer emails, and a sales dashboard.

EDUCATION

Purwadhika Digital Technology School — Fullstack Web Development — May – Oct 2025
Best Student, Batch 33 · Award · Certificate

STDI Imam Syafi'i Jember — Bachelor of Islamic Family Law · GPA 3.73/4.00 — 2020 – 2024
